

# FARC-EP

## 61 AÑOS DE LUCHA

4 de marzo del 2026

*"And do not think that those who were killed in the cause of God are dead. Rather, they are alive and receiving sustenance from their Lord"*

Surah Al-Imran, verse 169.

### A SOLIDARITY GREETING TO THE VALIANT PEOPLE OF IRAN

Mountains, savannas, and cities of Colombia.

We send to the dignified and valiant people of Iran our most fraternal embrace of solidarity for the martyrdom of the leader of the Islamic Revolution, Ayatollah Sayyid Ali Al-Huseini Al-Khamenei, and his family members, as well as for each of the martyrs who lost their lives, particularly the more than 180 girls murdered with the empire's bombs while they were in their educational institution, along with their families and teachers. From the revolutionary ranks of the FARC-EP, we feel profound pain at the cowardly and treacherous attack against the dignified nation of Iran by the Zionist entity of Israel and the decadent empire of the USA—countries led by two genocidal psychopaths, murderers, and child violators like Donald Trump and Benjamin Netanyahu.

We know that Zionism and imperialism see in the bodies of the girls and boys of the world either their object of pleasure or the enemy to be annihilated. They are sadists who must be erased from the face of the earth, condemned for crimes against humanity and for the crimes that have come to light in the so-called Epstein Files (Epstein was a MOSSAD agent).

Imperialism, in free fall towards the abyss of history, is leaving a mark of blood and pain on the peoples who decide to fight for dignity, sovereignty, peace, and self-determination. What these blood-addicted monsters do not understand nor remember is the famous phrase of Karl Marx: "Capital creates its own gravedigger." These insane actions may keep peoples subdued for a time, but as Iran has learned, to give in is only to prolong suffering; the only way out is the fight against the oppressor—and how well they have done so. Everything indicates that fear is changing sides. The peoples of the world are rising up, resisting, fighting, and triumphing against barbarism.

A multipolar world is being born from the ashes of imperialism and its lackeys. Institutions of all kinds, from the UN to FIFA, designed to perpetuate control and domination, are showing their true face. Lukewarm rulers who talk of dignity while their knees are skinned from bowing before the Trumps and Netanyahus are being unmasked. At the same time, artists, athletes, academics, journalists, and brave peoples from all over the globe are rising up, denouncing and educating in a spirit of resistance.

The Iranian people and its leaders have given the world a lesson in dignity. Their response of strength and honor to the criminals is an example to follow. As long as fear exists, we will be defeated, but when dignity, morality, and decency rise to the sky, we will be invincible.

We reaffirm our commitment to continue fighting for peace with social justice, against imperialism, and for the sovereignty of the peoples of the Americas and the world.

***People and dignity, Manuel Marulanda Lives... the fight continues!***
